

Give every student every opportunity to succeed.

Join us for Reaching All Learners, a special K–12 event.

In one day, education leaders will get hands-on experience with tools that help meet diverse learning needs.

You're invited to Reaching All Learners, a one-day immersion in the Apple technologies that help students achieve and thrive in school while building the skills they'll need to succeed in the workforce. At this event, you will:

- Experience a digital learning environment that serves all students, including those with special education, language, and literacy needs.
- Learn how Apple helps you support multiple learning styles, enhance collaboration and creativity, and extend the power to share their knowledge with a wide audience.

In one day, IT leaders will experience building and supporting a rich digital environment that reaches all learners.

Explore a digital environment that supports collaboration and creativity while allowing students to safely and securely access and share their work, both in and out of the classroom. At this event, you will:

- See how Apple has simplified the process of managing and integrating Mac computers and mobile devices within your existing network.
- Get a hands-on tour of new Mac OS X Snow Leopard and Snow Leopard Server.
- Learn new ways to support the entire education community—from students to teachers to administrators.
